

CHAPTER 3

Green Waste Transporters and Receivers

*The procedures outlined in this chapter apply to **green waste transporters** from inside the State Interior Quarantine (CCR 3434) or within 1.5 miles from a LBAM detection **and green waste receivers** within or outside the State Interior Quarantine (CCR 3434) or 1.5 miles from a LBAM detection receiving green waste from a regulated county.*

SECTION 1: COMPLIANCE AND CERTIFICATION

- (i) All green waste leaving the LBAM State Interior Quarantine **OR** the area within 1.5 miles of a LBAM detection must be accompanied by quarantine certification. Green waste may only leave a regulated county if destined for a green waste receiver that possesses a valid CDFA Departmental Permit
- (ii) In lieu of an original certificate, all green waste transporters working within and/or receivers receiving green waste from areas covered by the LBAM State Interior Quarantine **OR** within 1.5 miles of a LBAM detection, may be issued a compliance agreement by the county agricultural commissioner or LBAM Project ([CDFA PHPPS extranet site](#)). Use **Exhibit D** for green waste transporters and **Exhibit E** for green waste receivers located within a regulated county. A copy of the compliance agreement in the green waste transporter vehicle serves as quarantine certification
- (iii) Green waste receivers outside a regulated county may only receive green waste from a regulated county if they possess a valid CDFA Departmental Permit (requested from [CDFA's PHPPS Permit Unit](#)). As part of the Departmental Permit and origin/receiver compliance agreement, green waste must be processed (chipped, ground or shredded) to leave a county with a LBAM quarantine
